

Merriang SDS demonstrates a strong commitment to SWPBS by conducting regular fidelity measurements and reviews to guide their annual planning. To monitor Tier 1 discipline, the school utilises instantaneous graphs from the Big 5, ensuring timely access to valuable data on behavioural trends to create monthly problem solving action cycles.

To further enhance their SWPBS implementation, Merriang SDS could consider exploring the possibility of sharing their relevant data and annual evaluations in a more accessible and user-friendly format with various stakeholders, including families and the community. By linking this data to academic outcomes, the school can emphasise the significant impact of the SWPBS framework on students' overall learning and wellbeing.
